TO : Mr. Cochran *MC/E*

FROM : M. J. Stack *MS/E*

SUBJECT: HEARNAP

Purpose:

This is to recommend that the attached two boxes be filed as bulky enclosures to captioned file.

Recommendation:

That this memorandum be forwarded to the Records Management Division for appropriate processing.

Details:

The enclosed two boxes contain intra-Laboratory Chain of Custody Records, Laboratory worksheets of examiners in the Physic - Chemistry Section, photographs and other referenced-type material which will only be needed in connection with subsequent court trials.

The boxes do not contain any original correspondence or original enclosures to official Bureau correspondence.

Handing wrench from K450 (401-K-11)
To me drill in case (401-K-11)
Metal utility box containing: 1 section of, 1 ft.
narrow blades, pencils, sandpaper, piece rubber,
empty tool screw container, ruler, ice pick,
cutter, small punch (401-K-10)
Diagonal cutters from K450 (401-K-10)
Tape from K450 (401-K-10)
Chisel from K450 (401-K-10)
Screw driver from K450 (401-K-10)
Drill bit in case from K450 (401-K-10)
Coil of bare wire from K450 (401-K-10)
Red and white insulated wires from K450 (401-K-10)
Alligator clip from K450 (401-K-10)
Ammunition box contain. screws, nails, nuts and
bolts from K450 (401-K-10)

K451 Diagonal cutters from K450 (401-R-10)
K452 Tap from K450 (401-R-10)
K453 Chisel from K450 (401-R-10)
K454 Screw driver from K450 (401-R-10)
K455 Drill bit in case from K450 (401-R-10)
K456 Coil of bare wire from K450 (401-R-10)
K457 Red and white insulated wires from K450 (401-R-10)
K458 Alligator clip from K450 (401-R-10)
K459 Ammunition box containing seven shells, four and
bolts from K450 (401-R-10)

K450 Chisel from K450 (401-1-10)
K454 Screw driver from K450 (401-1-10)
K455 Drill bit in case from K450 (401-1-10)
K456 Coil of bare wire from K450 (401-1-10)
K457 Red and white insulated wires from K450 (401-1-10)
K458 Alligator clip from K450 (401-1-10)
K459 Ammunition box coated in, covers, shells, and bolts from K450 (401-1-10)

K455 Drill bit in case from K450 (401-2-10)
K456 Coil of bare wire from K450 (401-2-11)
K457 Red and white insulated wires from K450 (401-2-12)
K458 Alligator clip from K450 (401-2-13)
K459 Ammunition box containing seven shells, four and
bolts from K450 (401-2-14)

K457 Red and white insulated wires from K450 (401-4-10)
K458 Alligator clip from K450 (401-4-10)
K459 Ammunition box containing seven shells, pins and bolts from K450 (401-4-10)

bolts from K450 (901-8670)

3469 [redacted] PLIC's (AOL-3-N-00)

1369- Officers (401-44-33)

Re San Francisco airtel to Bureau, dated 9/22/75,
which furnished identification of 15 individuals for whom
latent prints were to be compared.

The following evidence, received from the
indicated locations, is being forwarded for appropriate
examination.

The FBI Laboratory is requested, when listing
specimens in Laboratory reports, to include the San Francisco
code numbers assigned to each item of evidence, in addition
to appropriate Laboratory specimen numbers.

41-Q One straw multi-colored purse.

41-I One white basket weave purse.

41-P One small black purse.

41-J One medium woven design purse.

41-N One tan purse.

37-B One white gym bag.

M 33-11-13

K. 1. PIPE NIPPLE

Nipple is 2" long & 3/4" in diameter.
The threads are badly rusted. No significant
alterations were noted.

K. 1000 D. 1000 A. 1000

(1) The components are all $\frac{3}{2}$ (singlets). The
 Union $\frac{3}{2}$ is the sum of $\frac{3}{2}$ and the other $\frac{3}{2}$
 opposite the slow motion $\frac{3}{2}$.

A matrix is a finite combination of all the
integers of the components, so that a matrix
consists of a number of rows and columns
of the order:

no discernable tool marks

M 37 95 6D 11

on a number

Devices consist of 2 rings, a 90° elbow and 2 end caps. The rings are 1/2" in dia (1/2" dia) and 4" in length.

The end caps exhibit the material used. Chances "J. P. Ward" on the end of the cap.

The 90° elbow exhibits the material on opposite sides. It is made of "H.T." respectively.

There are 4" holes drilled into the 2" x 4" elbow and the end caps of both pipe caps.

The holes at the opening of the elbow contain lengths of red and white wire. The red wire is 10' long and the white wire is 10' long. The red wire is connected to the ends of a length of "1/2" element" wire. The connections are wrapped with one length of black plastic tape. The opposite ends of the red and white wires are wrapped with 2 pieces of black plastic tape and attached within the elbow (see photo).

M 2245- L240

K471 Improvised explosive device (partially
fabricated) consists of: pipe nipple et al -
exhibiting the following dimensions:
2.385 O.D. (2" size)
1 ft length

2 End Caps exhibiting irregularities and markings
(in center of ends) resembling a "G" or "C" shape.
The end caps have been observed to have a
what appears to have been 704 device.

6 Volt Battery - Consists of "Eveready" High
Battery, NO. 5105, NEDA 915, 6 Volt. The battery
has been damaged on the bottom. The bottom
the bottom cover & 2 intermediate covers
util. primarily for cell circuiting / containment
being separated. The bottom cover exhibits
the code "IO" or "OI".

This battery is similar to K297 with
except K292 exhibits code "IO".

Spring driven alarm clock - Consists of a Wesclock ^{work} with circular ^{base} for firmness (no movement or model to discernable in effect). The plastic cover (base) has a ^{wood} screw ^{through} it at the 3 o'clock position. The ^{stripped} end of a length of white plastic insulated Cu wire (.035" dia) is wrapped around the screw. The ^{stripped} end of a length of red plastic insulated Cu wire (.034" dia) is wrapped around the body & "wing" projections of the wind knob and the other end is connected to a switch (see "switch" below). The ^{white} wire described above is unconnected and has been placed approx 2".

Switch - Consists of a SPDT switch with brown phenolic plastic body. The "switch blade" bears the designation "RODALE". The ^{other end of the} red plastic insulated Cu wire desc. above (the ^{stripped} end of which is fastened to the wind knob) is fastened to the knife blade lever terminal of the switch. It is noted that the switch was in open position. One of the end contacts of the switch has the ^{stripped} end of red insulated wire (.034")

K 1 - Continued - Page 3.

Switch

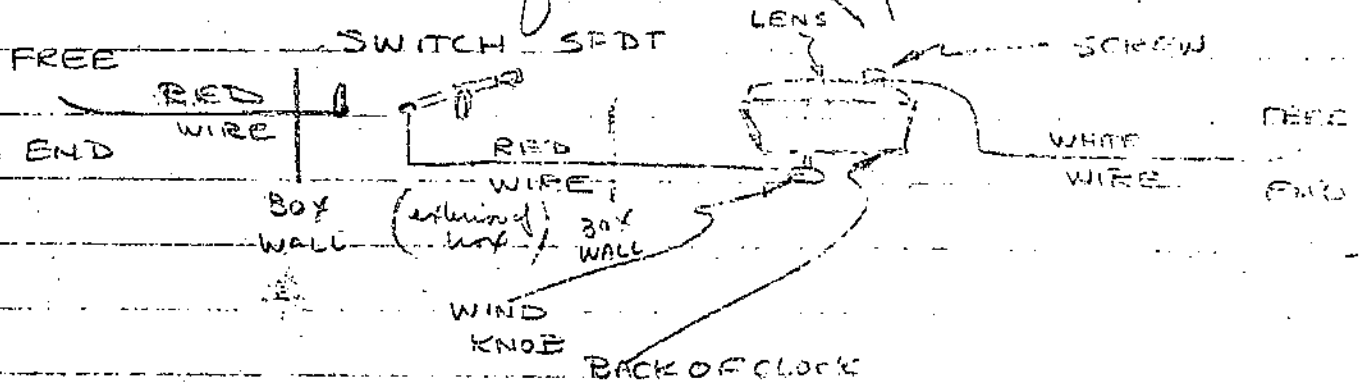

retained by the term, screw. The other end of this wire has been stripped for approx. $2\frac{3}{8}$ " and is unconnected. The switch is secured to a cardboard box (described below) with 4 lengths of $\frac{3}{4}$ " black plastic electrical tape to be described below. The 2 wires connected to the switch (described above) enter the box through 2 holes to either side of the switch.

Device Container

The device is contained within a cardboard box measuring 10"x14" by 4" deep. One corner of this box appears to have been torn and subsequently secured with $\frac{3}{4}$ " black plastic electrical tapes (2 pieces parallel with length, one piece going from top to bottom of the corner). On the ^{opposite} corner of the box ~~opposite~~ (the short side) is a small deep box which has been secured to the cardboard box with 8 lengths of 1" black plastic tape. The switch described above has been secured to the outside of the box (as described above).

K171 (Continued) - Page 4

Circuit - Examination of the device revealed the following partial circuit.

As examined neither the battery or the ground device were in the circuit.

Ex. 11 Continued - Page 35

Powder

The specimen also contained a 16 oz. (1 lb.) can of "Vesicular Blue Dot, Premium Smokeless Powder for Magnum Shot Shell". The lid of the can exhibits a price sticker with the following: "Siegel's Guns, 1, \$6.70". The bottom of the can bears the printed date: "Jan 8".

Microscopic exam. of contents disclosed 2 types of powder housed in ply. Configuration. One of which is "Blue dot".

Microscopic exam. of the pipe end cap revealed numerous particles of smokeless powder some of which are "Blue Dot". The presence of smokeless powder indicates the device to have at one time been filled.

Nipple - The specimen also contains a pipe nipple of the following dimensions:
D.I.A. 2.385" (2" size)
Length - 11"

The nipple exhibits no alteration.

K. Collected - Page 6

Tape

The device was partially wrapped in black plastic electrical tape in such a manner as to secure the battery to the pipe nipple. This tape $\frac{3}{4}$ " in width was cut with a tape dispenser type cutter. All the tape on the device has a continuous line to the tape in specimen K45 which is contained within a dispenser incorporated a cutter.

Toolmarks

Neither the device nipple nor the extra nipple from the specimens exhibited tool marks over and above those produced by the threading machines utilized during the nipple fabrication.

Remains "bridge wire" assembly,

142) Copper wire (.035[±]) with green plastic insulation

3) Blue wire (.020[±]) originally coated

did/didn't

K377

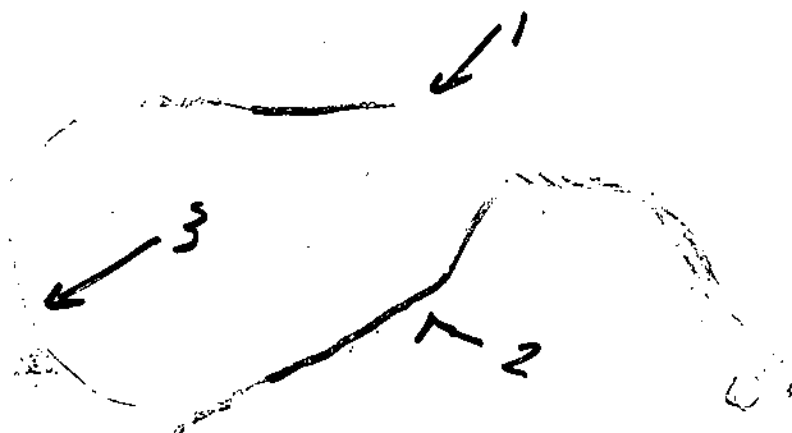

Handmade "bridge wire" Assembly

- 1) Copper wire (.035 \pm) with yellow plastic insulation
- 2) Copper wire (.035 \pm) with green plastic insulation
- 3) Brass wire (.025 \pm) originally coiled

Checked/Dictated

K-376 Wire (uncoiled - bsc.)
Homemade "bridge wire" assembly

Chasing on insulation of "1" & "2"
wires - tested in past.

1 & 2) Pinkish red plastic insulation, copper
wire (.035 \pm) OD insulation - .041 \pm

3) Bare wire (.016 \pm) originally coiled

checked / dated

K375: yellow insulated wire (RED-bag)

Coil of yellow insulated Cu wire w/
DNR other. pe. of like insulation.

OD INS. / .060 ±

DD wire / .035 ±

TM-8 cable cut, jawed, not from top end
pinch, other appears electrically
value.

~ to yellow insulated wire in K457.

K374 green insulated wire (MKD-689)

Coil of green insulated Cu wire plus a
short length of ~ wire & two pcs of insulation.

OD ins / .085 ±

OD wire / .035 ±

TH's ends cut, appear sheared (one end)
value one end, non-linear effects.

~ to wire in K437

MARK 4026

KS40 is a white insulated wire (MFD) 20, 22,

No mfg markings on insulation.

A) Red insulated wire

OD ins / .067 ±

OD wire / .035 ±

JM's:

B) White insulated wire

OD ins / .067 ±

OD wire / .035 ±

JM's: Cut, appear exact value.

11/27/52

K372 100% white insulated wire (AKO-623, 100%)

No mfg markings on insulation

A) Red insulated wire:

OD INS / .067 ±

OD wire / .037 ±

TM's: cut shear, limited value.

B) White insulated wire:

OD INS / .061 ±

OD wire / .036 ±

TM's: cut, appear shear, limited value.

11/25/51

R350 wire (11/25-51)

Length of bare steel-like wire - one
end cut, pinch valve. On this end
appears a second partial cut. Also
shows a tool having mfg. grind marks -
diagonal cutters. Other end is mfg. there.
OD .095 ±

Mr. Cochran *NC/3*

FROM : M. J. Stack *MS/3*

SUBJECT: HEARNAP

Purpose:

This is to recommend that the attached two boxes be filed as bulky enclosures to captioned file.

Recommendation:

That this memorandum be forwarded to the Records Management Division for appropriate processing.

Details:

The enclosed two boxes contain intra-Laboratory Chain of Custody Records, Laboratory worksheets of examiners in the Physic - Chemistry Section, photographs and other referenced-type material which will only be needed in connection with subsequent court trials.

The boxes do not contain any original correspondence or original enclosures to official Bureau correspondence.
